

Conway Planning Board Minutes
Tuesday, Jan. 13, 2026, 4 p.m.
Location: TOWN HALL

Present for the Planning Board: George Forcier, Chair; Members Jeff Lacy, Cheryl Case, Lara Matta Moebius, alternate member Joe Strzegowski.

Also BlueWave representative Marco Addonizio and Melinda Costello of Weston and Sampson engineering consultants

Absent: Member William Zale absent.

Hosted informal information meeting with representatives of BlueWave, developer of proposed agri-voltaic solar farm on Roaring Brook Road.

The developer will have to go through a special permit process if it files a formal application, but this informational meeting was to let the public, and especially abutters, know of the intent and what the project will consist of and to ask questions. Abutters will also be notified and asked to attend a public hearing process if the developers follow through with a formal special permit application.

About a dozen abutters and other residents attended, listened to the presentation and asked questions, with one abutter, whose bucolic view will change, promising to oppose the project. A Roaring Brook Road resident expressed concern about her view being affected. At least one other resident asked about moving the equipment pad behind the Boyden barn to shield it from public view. Addonizio expressed a desire to talk more with neighbors.
