

## **April 25, 2022 Town Administrator Update:**

- I had meetings with the Community and Economic Development committee last week, and they are currently reaching out to local businesses and interested in creating a calendar of community events to publish. I also met with the Finance Committee during their meeting to discuss and vote each monetary article. The Public Buildings Committee met with civil engineer Mark Beaudry of Civilworks New England to review the design plans and challenges associated with the proposed new public safety building. He will be sending a proposal to the committee for our review.
- April 30<sup>th</sup> is deadline for first ARPA report, which Jennifer Thompson of Capital Strategic Solutions has already created for the town.
- I received a call from a resident with two concerns to bring before the selectboard; the first is speeding on Bardwell's Ferry Road from Reeds Bridge straight up the hill, and the second is excessive littering on Station Road.
- I am happy to announce that the bench in honor of Ginny Knowlton, our former Town Clerk and Board of Health assistant, is now in place in front of the Town Hall. I forwarded pictures of the bench to her, and she seems very pleased.
