

# Join Fluvial Geomorphologist Nic Miller for a South River Watershed Tour

Nic will guide a tour of the watershed to provide the community an opportunity to learn about features of the watershed that are vulnerable to climate change. He'll also point out areas for potential resiliency projects.

The event will start with a brief presentation at the Town Hall, and then we'll begin the walking/bus tour.

We will tour the South River Meadow site to learn about floodplains...

...and several other locations to observe undersized culverts, berms, floodplain forests, bank stabilization projects, and more!

*Please join us!*

**Saturday**

**November 18, 2023**

**1-3ish pm**

*Rain date 11/19, same time*

**Meet at the Conway  
Town Hall,  
5 Academy Hill Road**

**RSVP and more details here:  
[bit.ly/southernrivertour1123](https://bit.ly/southernrivertour1123)**

*Project partners include Field Geology Services, GZA GeoEnvironmental, Franklin Regional Council of Governments, and the Town of Conway. Funding is provided by the MA Executive Office of Energy and Environmental Affairs (EEA) Municipal Vulnerability Preparedness (MVP) Program.*
